Ljevaonica Bjelovar L.t.d. captures its historical tradition of the establishment of early 20-century, after which followed a period in which the foundry created its market position and visibility in the production of castings from gray (SL) and ductile iron (NL) and alloyed cast iron, with a maximum annual capacity of 10,000 tons of castings, the foundry is one of the major manufacturers.

Today the company (founded in 1991.), is organized as a joint stock company under private ownership. Positioning in the domestic market, we have created the preconditions for business-technical cooperation with foreign partners that Ljevaonica Bjelovar provides to act as a reliable business partner. Furthermore, business-development policy is based on continuous monitoring of domestic and international markets as well as applying the new production procedures, modernizing equipment and facilities, changes in production programs and improving product quality.

Based on that, result is certificate controls of manufacturing process according to ISO 9001:2000, which represents the fundamental principles of business policy: expert advisory team of competent, creative development department of technology and design, shorter delivery times, quality and tradition.
